

Design guide for 38mm badge

Blue circle (48mm) = This is where we cut out the badge (it gets folded round the badge, which is why it's bigger than the badge itself). If the background of your badge is in colour, the colour should go all the way to the edge of the blue circle. Please do not delete this circle when you send us your design.

Red circle (38mm) = Actual size of the badge. Please delete this circle.

Green circle (32mm) = If you have writing or a logo on your badge, it should not be bigger than this circle - otherwise it might get folded over the edge when we're making the badge. Please delete this circle before sending the artwork.

**Please send your design in one of the following formats:
JPG, GIF, PDF or AI**
